April 5, 2002

TO THE MEADOWVILLE WATER USERS:

Enclosed is your 2002 assessment notice for the Meadowville Distribution System and a copy of a spreadsheet showing how the assessments were calculated.

At the water user meeting held on April 3rd, the water users voted that, at least for 2002, the assessments should be based on the same calculation method that was used last year. However, it was also requested that the state engineer develop alternatives for revising how the assessments are calculated and discuss them with the water users at a meeting to be held sometime this fall.

There was considerable discussion at the meeting about the need to install, re-install or repair measuring devices. The water users decided they did not have enough information to be able to set a budget for the measuring device work. **A meeting was set for Saturday, May 18, 2002 to inspect the locations where measuring devices are needed, determine the type of devices that should be installed, and determine an estimated cost for installation. Those who desire to attend should meet at Paul Lamborn's house at 7:30am.** This meeting will be held in conjunction with the decreed May 18th measurement of Jebo Creek and Tuft Creek.

At the April 3rd meeting, it was decided that an additional assessment notice should be sent to the water users this year to collect the necessary funds for the installation of the measuring devices. This additional assessment will be mailed after the May 18th meeting.

If you have any questions, please contact me at (801)538-7380.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lee H. Sim'.
